Career Objective

Obtain a position relating to Warehouse & Logistic.

Work Experience

WH FOREMAN

Y2023-Present

Be responsible Receiving & Put away team, Inventory.

- Inventory report.
- Prepared data for Mgr. Meeting weekly.
- Support ISO document.
- Support KPI in department

WH FOREMAN

Y2022

For multi skill in Warehouse, be responsible Receiving & Put away team, Inventory.

- Support WH project improvement spaceutilayzation find supplier for install Rack
- And coordinator for push project complete
- Inventory report
- Asst's Mgr Impartment job description (JD) to modern JD For Y2023
- Support KPI in department

WH FOREMAN

Y2021

Be responsible Delivery Truck control plan.

Routine job

Truck control plan daily, monitor plan achieve to the target today, summary daily report in from to Mgr, Improvement WI about Delivery team, Evaluation transportation for improvement monthly.

Virtual Audit Check the truck monthly.

-Assist supervisor/Mgr management KPI Y 2021 responsible topic “Transport cost not over 1.50% from sale amount.”

We have action item as below

- 1.Truck for rent monthly management for one long single trip and two single trips at Amata area
- 2.Simulation for truck rent monthly for one more to save transportation cost for partial rental trucks

3. Grouping customer zone and classify capacity container truck

But summary actual end of year 2021 = 1.77 % We have look back (PDCA) as below.

What are the issues?

1. Adding/Urgent order without plan, it is the main of truck cost management.
2. Double truck for delivery and pickup NG.
3. Supplier delivery delay, not follow PU plan

What is the solution?

1. Setting a meeting with all concerned departments to discuss how to decrease the adding/urgent order from customers together.
2. PU plan need to be followed up closely with all suppliers ahead.
3. QC on site for supplier improvement of NG problem (If can).

Got promoted from Leader to WH FOREMAN

Y2020

Be responsible picking & Loading team, Support KIKAN system (resemble ERP, winsped) outgoing inspection

-Assist supervisor/Mgr management KPI Y 2020 responsible topic "picking mistake Not over 100 ppm"

We have action item as below

1. Set up teams for picking the products (TTKL, Okamoto, Amata, Rayong)
2. Use picking list to pick the products and mark item by item
3. Leaders for each team re-check product along with the same picking list to prevent the picking mistake
4. Leaders have made the record of picking mistake for each operators for picking improvement
5. The operators have checked the product items on the invoice compared with the picking list before loading products to the trucks
6. Summary report monthly to Manager.

But summary actual end of year 2020 = 227 PPM. We have look back (PDCA) as below.

What are the issues?

1. The operators sometimes use their memory for picking parts rather than tag label.
2. Leaders sometimes do not cross check parts carefully such as poly bag items

What is the solution?

1. To inform the operators for picking part as tag label rather than using their memory because it leads to picking mistake easily.
2. Leaders must focus or cross check part carefully especially poly bag items by counting pack by pack to avoid picking mistake
